Child on Child Harmful Behaviours Action Plan

Background: We now know that in education generally, some young people have felt that they have not had a voice to raise concerns and even when some did, they felt they were not listened too. Hampstead Fine Arts College recognises that we must start from the position that harmful behaviours are taking place and affecting our students lives both in school and outside. Along with our board of Governors, we have drawn up this action plan to ensure we have put procedures and policies in place for all our students to feel they can raise issues and we will hear and act.
